When Shot Clocks Start and Incomplete Applications:

<https://docs.fcc.gov/public/attachments/DOC-353962A1.pdf>

137. In the 2014 Wireless Infrastructure Order, the Commission clarified, among other things, that a shot clock begins to run when an application is first submitted, not when the application is deemed complete. The clock can be paused, however, if the locality notifies the applicant within 30 days that the application is incomplete. The locality may pause the clock again if it provides written notice within 10 days that the supplemental submission did not provide the information identified in the original notice delineating missing information.
